Washington, DC 20554

Dear The Federal Communications Commission,

I Oppose to the "flat fee" tax increase because not everyone had enough money to pay for one now...and most people all they have are cellphones and if you raise them then they could lose that..cellphones use to be for protection now its for all different stuff but all my family knows is that if you raise this you will lose alot of people..but think of the people before you think of yourself.

Sincerely,

Mary Goodman
